

CONID CREATIVE CONTEST

TECHNICAL GUIDELINES

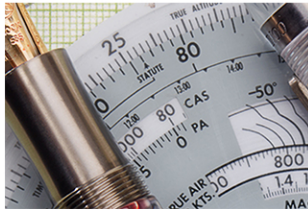

The 6 checks to comply with the expectations

RESOLUTION AND ASPECT

Use the highest resolution possible, preferably larger than 2560 x 1440 pixels. The maximum file size is 15MB

ORIENTATION

Please use landscape photos only. Portrait orientation may offer creative benefits, but such photos are very hard to use in certain layouts when we showcase your work!

PURE AND UNEDITED

No filters, no extra cropping or rotating, no removing of dust particles or other corrections necessary. We know how difficult clean pen photos are, so this will not be part of the criteria judged in the selection process.

COMPOSITION

Either a single Bulkfiller, fully visible within the frame with a certain space at the boundaries, or either a nice crisp close up of a detail. Something in between will not be accepted.

BACKGROUND

No pictures with a plain white background. As mentioned before, we are not looking for studio-perfect product photos!

SUBJECT

Although we appreciate the diversity of your collection, the focus of this contest is to share photos of your Conid fountain pens.
